DETAILED ACTION

Continued Prosecution Application

1. The request filed on 5/30/02 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/456,105 is acceptable and a CPA has been established. An action on the CPA follows.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cone (US 4,766,292) in view of Daniele (US 5,444,779).

Cone teaches reading a UPC label on a merchandise item thereby generating data identifying the merchandise item. This data is transmitted to a processing unit 94 which has stored therein lookup tables for use in retrieving the price of the purchased item utilizing the data generated by a scanner 90 in scanning the UPC label. The processing unit 94 will enable a display member 96 to display the price of the merchandise item (col. 3, lines 55-62).

Cone lacks the teaching of embedded glyph data.

Daniele teaches a glyph code within regions 150 or 152 of a document (col. 7, lines 22-24).

One of ordinary skill in the art would have readily recognized that glyph codes have a non-obtrusive appearance that may be more appealing to the eye than a typical UPC code on a product. Therefore, it would have been obvious, at the time the invention was made, to modify the teachings of Cone with the glyph code as taught by Daniele for aesthetic reasons.

Response to Arguments

5. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection. The newly amended limitations citing "retrieving from a storage location, second information that corresponds to the registration information" induced new grounds of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jamara A. Franklin whose telephone number is (703) 305-0128. The examiner can normally be reached on Monday through Friday 8:00am to 4 30pm.
